

Electric powered truck specifically designed for coil handling:

No manual operation.

Coil tilting is fully controlled: safety is improved.

Truck is able to pick up coil from a standard wooden palette.

STEP 1:

Thanks to forks shape, truck is able to take coil directly on multi coil pallet. Position of wooden spacer will be specified during study.

STEP 2:

Due to tilting system, Coil can be tilted to horizontal axis position.

STEP 3:

Coil can be loaded directly on decoiler mandrel.

STEP 4:

Side shift plate system is used to drop coil on the mandrel.

	Coil					Truck			
	Weight kg	Outside max Ø mm	Outside mini Ø mm	Width mm	Inside Ø mm	Maximum height of forks mm	Forks thickness mm	Forks closed : Space between forks mm	Forks opened : Space between forks mm
